## **1. Introduction**

Welcome to SpareShare, the ultimate hub for top-notch tech parts. Our platform is designed to provide professionals and enthusiasts with everything they need to power innovation and achieve technological excellence.

## **2. Motivation**

In today's fast-moving tech world, finding reliable replacement parts can be tricky. At SpareShare, we make it easy by offering a wide range of components, from Keyboards to CPUs. With our simple interface and focus on customer satisfaction, we help you repair and upgrade your devices, reduce waste, and support sustainability all while fueling innovation and creativity.

## **3. Project Implementation**

We utilized HTML5 to structure and input data and content into our website, and we styled it directly using internal CSS. No external CSS files or styling libraries, such as Bootstrap, were used in this project.

## **4. JavaScript Functionality**

JavaScript was used in our project for the functionality of the Login and Registration Pages, and for the Hamburger Navigation Bar. We also used DOM in our HTML5.

## **5. Additional Technologies**

We used the JavaScript library jQuery for its simplicity and efficiency in handling DOM manipulation and event handling. It streamlines the development process and contributes to a more interactive and engaging platform.

## 6. Screenshots

## 7. Languages Used

SpareSphere is powered by the following front-end languages:

- **HTML (Hyper Text Markup Language):** serves as the backbone of the project. It gives our content a clear structure, making it easy for users to navigate. We spent a lot of time planning the HTML to create a design that's both user-friendly and visually appealing.
- **CSS (Cascading Style Sheets):** styles HTML elements, controlling layout, colors, fonts, and spacing to enhance webpage design and responsiveness.
- **JavaScript:** is used to add interactivity and dynamic features, enhancing the user experience with smooth transitions, dynamic content loading, and real-time user interactions such as form validation and responsive navigation.
- **jQuery:** jQuery is utilized for its ease of use and effectiveness in managing DOM manipulation and event handling. It simplifies the development workflow and enhances the platform's interactivity and user engagement.
- **JSON:** is utilized for the local storage functionality, enabling seamless integration of items with the cart page.

## 8. Features

### a. Home Page:

- Contains two sentences that briefly state our mission.
- Popular products: Our popular products include high-quality processors, graphics cards, and storage solutions.
- Limited-time offers: Our limited-time products offer exclusive deals on premium tech parts, available while supplies last.

**b. Login and register Page:**

- Users can either log in if they have an account or register for a new one if they don't.

**c. Shop by category:**

- This page contains many categories such as CPU's, GPU's, Motherboards, RAMs, and Accessories.

**d. Deals:**

- This page highlights the latest products available.
- It offers two display modes: dark and light.

**e. Add to Cart:**

- This page displays a comprehensive table of all your orders, including the price and quantity of each item, as well as the total order cost.

**f. About Us Page:**

- This page displays a comprehensive table of all your orders, including the price and quantity of each item, as well as the total order cost.

**g. Contact Us Page:**

- This page provides our contact information, including our email address, phone number, and social media handles. Additionally, it features input fields for your name, email, phone number, and message, enabling you to reach out with any inquiries.

**h. Footer:**

- It contains contact details, navigation links, and policy information.

## 9. Future Enhancements

- Improving the service with modern technologies.
- From the users ' feedback, offering more features to fit users' needs.
- Always learning and exploring new ideas.
- Delivering top-quality products.

## 10. Conclusion

In summary, SpareSphere is your ultimate destination for top-quality tech parts, designed to meet the needs of professionals and enthusiasts alike. With a commitment to reliability, innovation, and customer satisfaction, we ensure that you find exactly what you need to power your projects and upgrades. From cutting-edge components to trusted essentials, SpareSphere is where technology meets convenience. Join us in shaping a smarter, more connected future one part at a time.

## 11. Design Considerations

We implemented a responsive design using media queries to ensure the website functions seamlessly across various devices.

## 12. Collaboration and Roles

Our team utilized GitHub as the primary hosting platform for our code repository. Responsibilities were effectively allocated among the team members to ensure a smooth workflow. Ahmad Mansour was responsible for developing the **Login and Register** page, the **Add to Cart** page, and the **Shop by Category** page. Amad Elhaj developed the **Home** page and the **Deals** page. Nibal Malaeb contributed by creating the **About Us** and **Contact Us** pages, in addition to preparing the report and the PowerPoint presentation. The overall design was a collaborative effort, reflecting the collective input of the entire team.
